# Collect your own data

After completing your tally chart, it is time for you to illustrate your findings in a pictogram. You can then discuss the following questions:

What is the difference between the highest and lowest data collected?

What data did you collect the most?

KEY

Collect your own data

It is time for you to complete your own data gathering like a true explorer ! Collect as much data as you'd like and represent them in the following graphs.

Tally Chart

What is the total of participants in your datat collection?

Collect your own data

You have completed the tally chart and the pictogram, but now it is time to illustate your findings in a block diagrams.
Remember to use your X and Y axis !

Block Graph
